

## THEY'VE GOT A PLAN. YOU'VE GOT GREEN WAY® + ANTOPIA® 6

Eliminate the colony before it surfaces. GREEN WAY® LIQUID ANT KILLING BAIT in ANTOPIA® 6 REFILLABLE BAIT STATIONS—Trusted by professionals for over 20 years to deliver all-season control and fewer callbacks.

- MIMICS ANTS' FAVORITE FOOD.**  
Honeydew formula keeps ants feeding longer to maximize uptake of active ingredient, disodium octaborate tetrahydrate (DOT).
- EFFECTIVE AND RELIABLE.**  
DOT is effective against both ants and roaches, with no known resistance and low toxicity to people and pets—ideal for baiting applications.
- VERSATILE AND MOLD RESISTANT.**  
Our 1% DOT formula resists mold growth—even when diluted 1:1 with food grade attractants for targeting colonies with changing feeding preferences.
- ELIMINATION OVER CONTROL.**  
University-tested, delayed-action bait allows foragers to share with nestmates and queen(s) for proven colony elimination.
- FEWER CALLBACKS ALL YEAR.**  
Use outdoors in every season with ANTOPIA® 6 Refillable Bait Stations to prevent evaporation, contamination, and UV breakdown.
