Green Way®

Liquid Ant Killing Bait (U.S. Only)

Green Way® Liquid Ant Killing Bait (US) is available in gallon and quart bottles and contains 1% disodium octaborate tetrahydrate (DOT) as the active ingredient. Our **'Honeydew Formula'** is scientifically formulated to mimic the ant food produced in nature by aphids and scales. **Green Way® Liquid Ant Killing Bait** is specially formulated to retard the development of mold for up to six months and allow dilution to .5%. The ability to dilute the bait with any food grade diluent helps optimize its cost effectiveness and significantly increases the potential for acceptance by a wide variety of ant species. DOT is similar in safety to borax and boric acid. It works slowly, allowing the active ingredient to make its way all the way to the queen, so that you can get true colony elimination.

For use with **ANTOPIA® 6** or other enclosed baiting stations intended for liquid bait.

GOURMET®

ANT BAIT GEL

Gourmet® Ant Bait Gel (U.S. Only) 6 Syringes & Plungers Per Box

Gourmet® Ant Bait Gel contains 6% **Disodium Octaborate Tetrahydrate [DOT]** in a bait matrix that stays where it is placed, is attractive to both sweet and protein-feeding ants and will not become runny even if exposed to 150°± for several hours. Gourmet® Ant Bait Gel can be used indoors or outdoors in cracks and crevices, or in **Bug Bar®** or **Ant Café® Refillable Bait Stations** to quickly eliminate foragers. They are shipped six syringes and plungers per box, eight boxes per case and four cases per master case.

Product ID	Shipping Qty./Unit	Case Dimension (in.)	Shipping Weight (lbs.)
GABG-048	8 Boxes/Case	19x12x4	10 lbs.

Gourmet® Ant Bait Gel (U.S. Only)

Each box contains four patented **Ant Café® Bait Stations**, and one syringe (with plunger) containing 1.5 ounces of **Gourmet® Ant Bait Gel**. Gourmet® Ant Bait Gel is a blend of sugars and proteins that attracts a wide variety of ants and roaches. The active ingredient is organic and related to boric acid. It has a low toxicity level and is safe to use around children and pets. The delayed activity allows the toxicant to kill not only the workers, but also queens and the colony.

Ant Café® Refillable Bait Stations + Double-Sided Tapes and Locking Ties

Ant Café® is a one-piece bait station for crawling insects with a polypropylene construction that allows it to be used indoors or out with our locking tie and/or tape anchor system. It is easily adjustable and the 1/8" access is ideal for reducing liquid or gel bait evaporation while still allowing access to small sweet-feeding ants. The size of the hole in the hinged end can be increased by inserting the tip of a pen or pencil to the pre-cut 1/4" diameter, and the sealed end can be adjusted in the same manner to allow either 1/8" or 1/4" access. The larger diameter holes are used when large ants or small roaches are the target pest and a granular or gel-type bait is used.

Ant Café® is sold in packages of 48. The packages are resealable zip-lock bags that protect the stations from contamination during storage and transport. The bags are imprinted with directions for use and include 48 double-sided tapes and 50 flat-locking ties.

Bug Bar[®] Refillable Bait Station

Bug Bar[®] Insect Bait Station is an ingenious, safe and easy-to-use, refillable/disposable delivery system for **Green Way[®] Liquid Ant Killing Bait[®]** or **Gourmet Ant Bait Gel[®]**. Designed to deliver focused treatments for ants and roaches, this clever configuration can be refilled even when closed through the filler hole in the lid. Bug Bars are shipped 50 unfilled bug bars per box, 20 boxes per case.

- **Bug Bar[®]** Insect Bait Station is a sturdy, attractive, bait station approx. 2" square.
- Holds up to 1/3 ounce of liquid, gel or granular bait.
- Ribs on the entryway provide a secure foothold for ant and large roaches.
- Cover easily snaps closed and is difficult for small children to open.
- **Bug Bar[®]** can be secured in place with double-sided tape or 'Hercules' putty.

ANTOPIA® 6

The **ANTOPIA® 6 Bait Station** is a weather-tolerant, bait dispensing system with several unique patented features. ANTOPIA® 6 employs **Feeding Float Technology [FFT]** to make it easier for ants to access the bait and return safely to their nests, where they can share the bait with the colony.

ANTOPIA® 6 is designed to hold up to 6 ounces of liquid, gel or granular bait in a spill-resistant configuration. ANTOPIA® 6 is built strong for multi- season use and cost effectiveness.

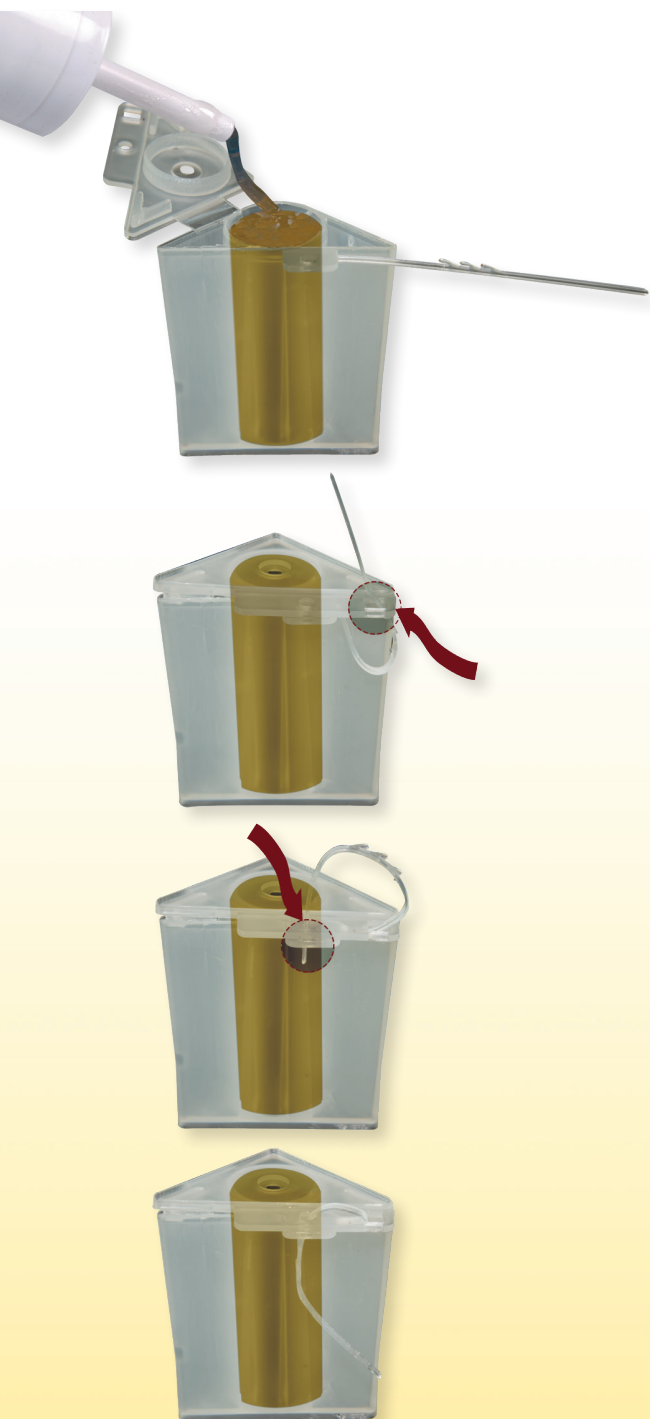

- Kills ants 24/7 while protecting the environment and beneficial insects
- Integrated ABS cover protects the bait from heat, UV light and contamination
- Holds up to 8 ounces of liquid or granular ant bait
- Feeding float reduces evaporation and keeps ants from drowning
- Securely anchors in the ground
- Structural guides built into the station to increase effectiveness
- View ports let you check bait level without disturbing the station
- Sturdy construction for years of service

ANTOPIA 6-6	6 Stations Per Box/4 Boxes Per Case	17x17x24	18 lbs.

Ant Café® Pro

The **Ant Café® Pro** is larger than the Ant Café®. It can hold up to 1/3 of an ounce of liquid, gel or granular bait.

The size of the hole in the hinged end can be increased by inserting the tip of a pen or pencil to the pre-cut 1/4" diameter, and the sealed end can be adjusted in the same manner to allow either 1/8" or 1/4" access. The larger diameter holes are used when large ants or small roaches are the target pest and a granular or gel-type bait is used.

The **Ant Café® Pro** can be securely sealed by passing the attached serrated locking extension through the molded eyelets (*please see usage sequence at left*) and the triangular shape permits placement close to walls, on window sills and even kitchen counters.

HINTS FOR MORE EFFECTIVE USE

- Store away from chemicals.
- Always keep in sealed zip lock storage container.
- Keep away from cigarette, cigar and pipe smoke.
- Wash hands thoroughly before handling insect baits or bait stations if you have been handling repellent pesticides or smoking.
- Do not use non-bait pesticides on or near bait stations.
